👤 PROFILE

Junior web developer with a passion for creating user-friendly, impactful web applications. Skilled in front-end and back-end development, with a portfolio of projects that solve real-world problems. Experienced in building responsive web applications using modern frameworks and libraries. Eager to expand expertise and contribute to innovative projects in web development and beyond.

🎓 EDUCATION

Bachelor of in Computer Science (BSC)
Unity University

2022/01 – 2026/04
Addis Abeba, Ethiopia

📁 PROJECT EXPERIENCE

AI-Recruitment System 🔗

- Developed an AI-powered recruitment platform for the Ethiopian Airlines hiring process that streamlines candidate applications, automates resume screening, and matches applicants to job requirements using AI. The system improves recruitment efficiency by reducing manual screening and providing recruiters with intelligent candidate recommendations.

Car Rental System 🔗

- Built a web-based platform for renting and managing cars with real-time availability. Implemented booking, user authentication, and an admin dashboard for managing vehicles and rentals. Designed a responsive, user-friendly interface for smooth customer experience.

Amazon Clone 🔗

- Developed an e-commerce UI with product listings and a working cart. Created a fully responsive layout using Material-UI and custom CSS. Focused on clean design, usability, and smooth shopping experience.

Netflix Clone 🔗

- Built a Netflix-style React app using the TMDb API. Displayed movies with reusable components and a dynamic banner. Used React hooks for data fetching and state management.

Portfolio 🔗

- My portfolio showcases my skills and projects in web development. Built with React, it features a clean and responsive design, smooth navigation, and an interactive user experience. The site highlights my best projects, complete with descriptions and GitHub links, and is optimized for performance.
